Summary

MERN-stack developer with 3+ years of experience specializing in building scalable, high-availability web applications using Node.js, NestJS, React.js, Angular, Microservices, Kafka, Redis, MongoDB, and PostgreSQL. Strong background in distributed systems, low-latency REST APIs, event-driven architecture, and caching strategies while creating clean, reusable UI components following SOLID principles.

Technical Skills

Languages: JavaScript, TypeScript, Core Java, HTML, CSS

Frameworks/Libraries: Node.js, NestJS, Express.js, React, Angular

Databases: MongoDB, SQL, MySQL, PostgreSQL

Architectures: Microservices, Event-driven Architecture, Microfrontend

Tools: AWS, Git, GitHub, PGAdmin, Robo3T, Postman, Jira, VS Code, Copilot

Devops & Testing: Jest, CI/CD, Agile, Scrum

Experience

Infosys

Jul 2022 – Present

Senior Systems Engineer

Hyderabad, India

- Designed and Developed 10+ microservices and microfrontends from scratch, translating design specifications and stakeholder requirements into scalable, production-ready solutions.
- Designed and implemented robust RESTful APIs with proper versioning, validation, and error handling mechanisms.
- Applied idempotent API design and ACID-compliant transactions to ensure data integrity and reliability.
- Architected event-driven communication using Kafka for scalability, loose coupling, and fault isolation.
- Designed and deployed serverless applications using AWS Lambda, reducing infrastructure overhead and improving scalability for event-driven workflows.
- Developed scalable and reusable UI components using React.js, Angular, TypeScript, and modern ES6+ features.
- Collaborated in an Agile development environment, participating in sprint planning, stand-ups, and retrospectives.

Infosys

Jan 2022 – June 2022

Software Developer Intern

Remote, India

- Developed responsive frontend applications using React.js and built backend APIs using Node.js, Express.js, and Mongoose.
- Implemented RESTful APIs with pagination and query optimization while collaborating with cross-functional teams in an Agile environment.

PROJECTS

UMS (Unified Manage System)

- Developed a web application providing a platform for admins to handle CRUD operations on users, making it more scalable and user-friendly.
- Improved performance through query optimization, indexing, and caching, enabling stable performance under concurrent traffic.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2018 - 2022

Rajiv Gandhi University of Knowledge and Technologies, Andhra Pradesh, India

CGPA: 8.2/10

CERTIFICATIONS

- **GitHub Foundations Certification – GitHub.** [Link to Certification](#)
- **JavaScript Algorithms and Data Structures Developer – freeCodeCamp.** [Link to Certification](#)
- **Back End Development and APIs Developer – freeCodeCamp.** [Link to Certification](#)
